GetVibe API

WHITE LABEL FOR RESELLERS

Your own AI API, under your brand

A ready-made AI access service: your domain, your logo, your prices, your clients. Models, routing, billing and infrastructure are on us.

THE OPPORTUNITY

Your clients need AI models. Sell access under your own name

BUILD IT YOURSELF

- Contracts and payments with model providers
- Your own billing: per-token charges, media, refunds
- Card payments, disputes, invoices
- Failover, rate limits, abuse protection
- Catalog and price updates every day

WITH GETVIBE WHITE LABEL

- **Hundreds of models** behind one key — already connected
- **Billing, client dashboard, admin console** — already running
- **Payments to your own Stripe** — or we collect them for you
- **Automatic routing** with failover
- You focus on **sales and clients**

The same platform that runs getvibeapi.com — with your brand instead of ours.

WHAT YOU GET

A complete service your clients see as yours

263
models in the demo catalog: text, images, video, speech, music

$0
setup fee

$0
monthly fee

Yours
brand everywhere: clients never see us or our providers

Your website

Your domain, name, logo, colours, homepage copy and SEO. Model catalog with prices, docs, sign-in and sign-up.

Client dashboard

API keys with limits, teams, usage stats, request log, a playground, media generation, a Telegram bot.

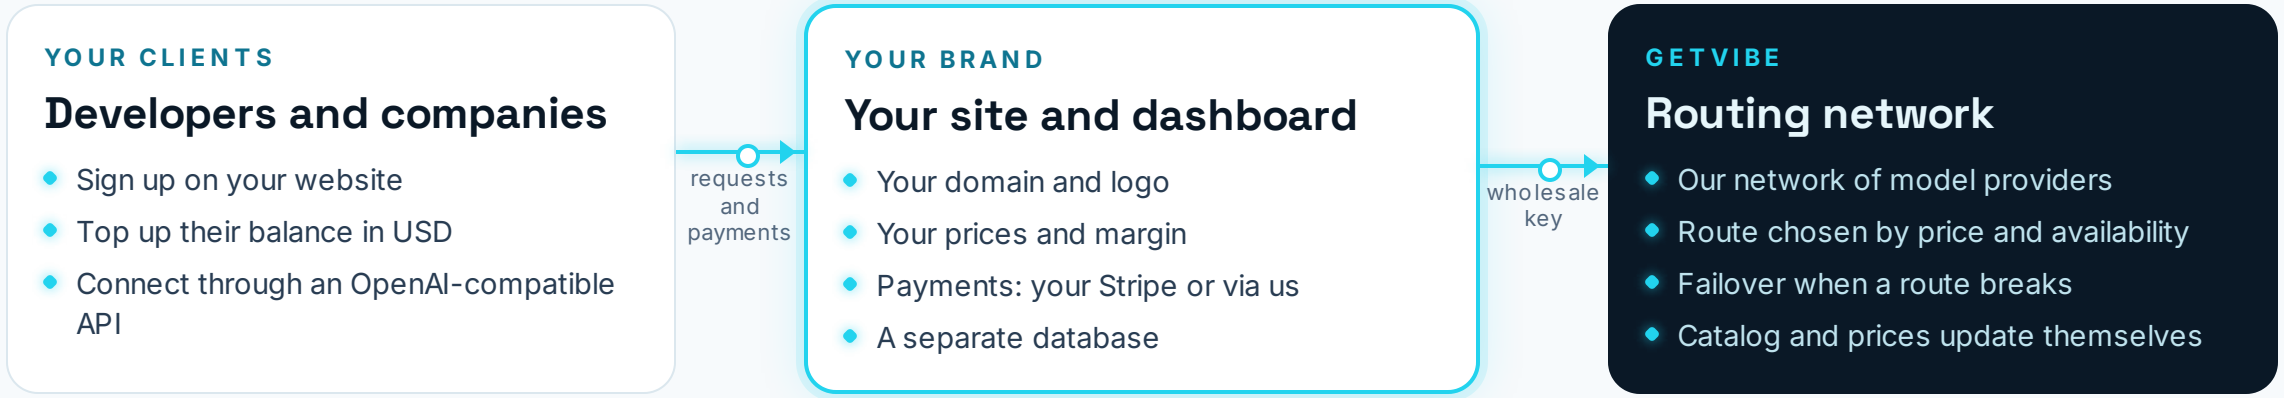

Admin console

Clients, money, prices, promos, mailings, support, analytics and profit forecast — no need to ask us.

Model count: demo catalog on 15 Nov 2026; it follows our catalog as it changes.

HOW IT WORKS

Your clients only ever see you

Money Your client pays your price → you buy from us at our regular client price → the difference is yours.

CATALOG

Every kind of model behind one key

263
models in total

72
text and code

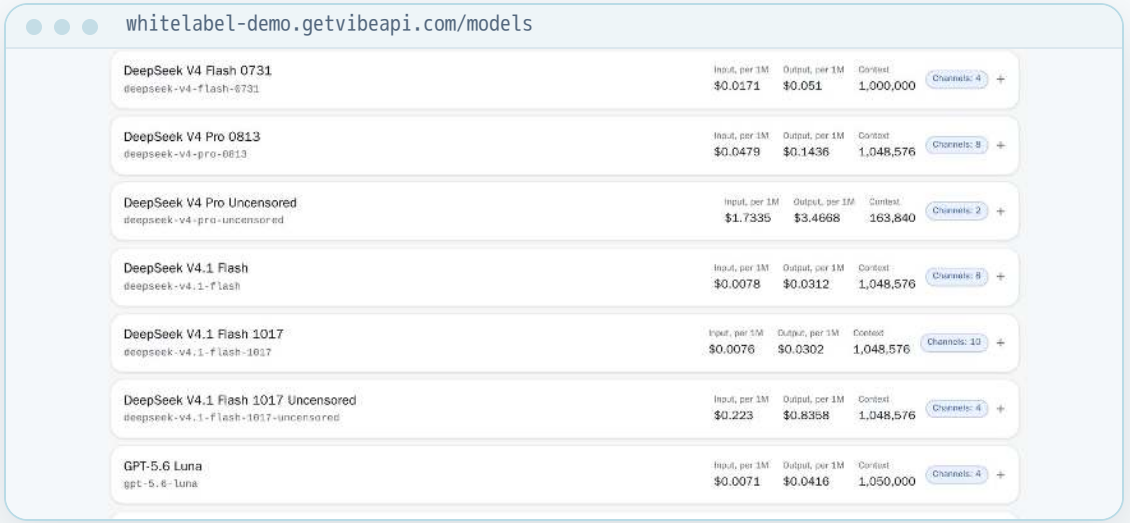

78
video

51
images

40
speech and audio

10
music

7
embeddings

Demo site, 15 Nov 2026. New models appear for you automatically — you decide which ones to sell.

TWO CATALOG MODES

Just sell models — or manage channels

DEFAULT

Simple

Clients see models only — no channels, no providers.

- Per model: **your sell price** and **a maximum purchase price**
- We route each request **only through routes within your ceiling**
- A sell price below cost is highlighted in red
- Chat and media; embeddings and rerank are in Advanced

FOR POWER USERS

Advanced

Channels with different price and quality — clients can pick one.

- **Margin per channel**, per model or site-wide
- Margin by price band, price limits, fixed prices
- Embeddings and rerank

Switch modes in the console at any time; no data is lost.

RESELLER CONSOLE

Run the business yourself

01 Clients and balances

Client records, manual credits and debits, blocking.

02 Payments and refunds

Your Stripe keys, refunds from the console, chargeback handling.

03 Analytics and reports

Revenue, cost, margin, best and loss-making models; CSV export.

04 Money issues queue

Every open money question in one place, plus a daily reconciliation.

05 Forecast and alerts

How long the balance will last, spend spikes, models in the red — by email and Telegram.

06 Promos and referrals

Promo codes, a referral program, a bonus for joining your channel.

07 Mailings and news

Email and Telegram campaigns by client segment; news in the dashboard.

08 Support desk

Client tickets with screenshots, internal notes, replies by email and bot.

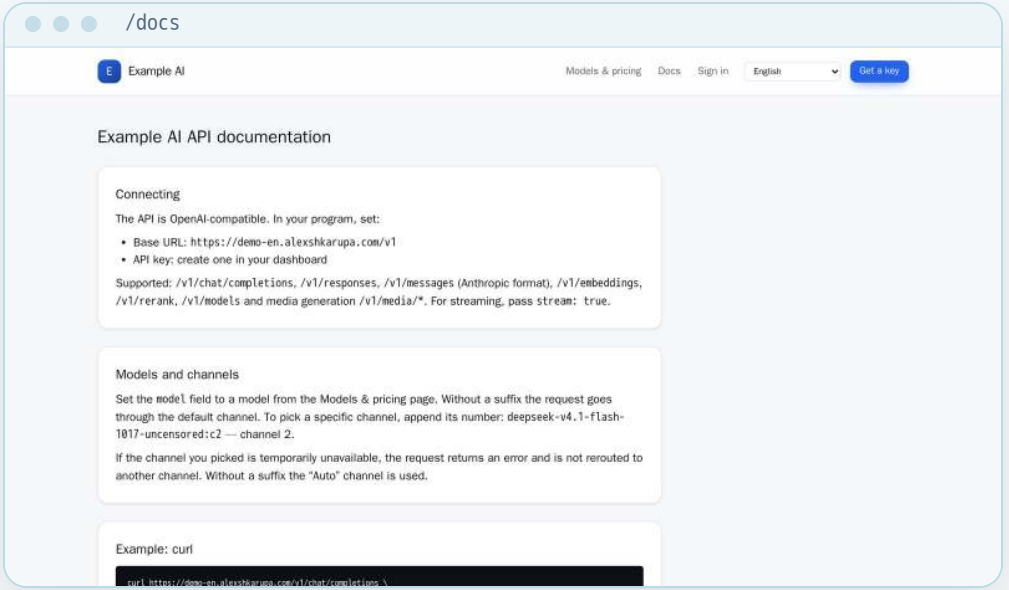

09 Brand and domain

Logo, colours, copy, company details, custom domain. Setup wizard, admin 2FA.

YOUR CLIENT'S DASHBOARD

Everything developers expect

- **API keys with limits:** models, IP addresses, spend cap, requests per minute.
- **Teams and organisations:** members spend the organisation's balance within personal limits — for text and media.
- **Usage and request log:** spend by day, model and key, details of every request.
- A **playground** to try models and **media generation** right in the dashboard.
- **Setup guides** for Cursor, Claude Code and Codex.
- A **Telegram bot** under your name: sign-in, balance, top-up notifications.

Docs are generated for your domain.

GROWTH TOOLS

Win clients and keep them

TELEGRAM

A bonus for joining your channel

A client links Telegram, joins your channel and gets a one-time balance bonus. Your bot checks the subscription.

Free DeepSeek for subscribers

While subscribed, a client gets a free DeepSeek model. The client pays nothing; you pay a small wholesale cost for those requests. You set the per-client request limit and a daily spend cap.

PROMO CODES

Campaigns and partner codes

A balance bonus by code — for launches, webinars, partners. Promo spend shows up in analytics.

REFERRALS

Clients bring clients

A reward to the referrer from referred clients' top-ups. If a top-up is refunded, the reward is revoked automatically.

Plus segmented mailings: "inactive for a while", "never topped up", "balance above an amount".

RELIABILITY AND SECURITY

Runs like our own service

Failover

Automatic routing: if a route fails, a request without a pinned channel moves to another.

Fair queue

A concurrency limit per client and per key — one client can't slow down the rest.

Rate limits

Request rate limits and a sign-up captcha against bots.

Graceful updates

Responses in flight finish; new requests are politely asked to retry.

Your own database

Each reseller gets a separate database: your clients are isolated from anyone else's.

Backups

Encrypted database backups twice a day, kept for 4 days.

Monitoring

We watch site availability and every instance.

Money under control

Only successful requests are charged, daily reconciliation, admin 2FA.

HOSTING AND PAYMENTS

International reseller: USD, no entity required

HOSTING

Canada or France

Choose where your site and its separate client database run.

Singapore — coming soon

MONEY

Prices in USD

Balance, prices per 1M tokens, media, reports, emails — all in dollars, charged to fractions of a cent.

COMPANY

No legal entity needed

Add your country and a registration number if you have one. WeChat and QQ support contacts supported.

PAYMENTS · OPTION 1

Stripe on your own account

Clients pay by card on Stripe; money goes straight to you. A balance is credited only after Stripe confirms the payment.

PAYMENTS · OPTION 2 OPTIONAL

We collect payments for you

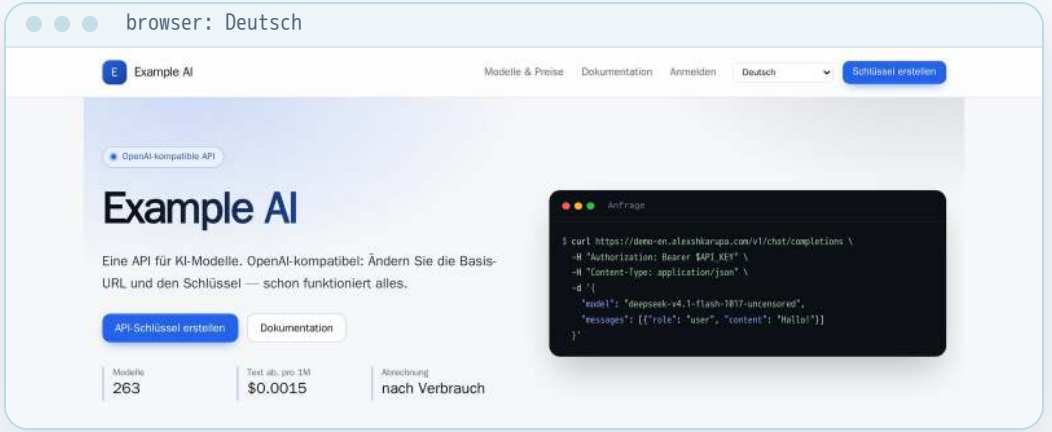

Crypto and Stripe — cards, WeChat Pay, Alipay and 30+ other methods. We pay out your net profit.

10 LANGUAGES

Your site speaks your clients' language

English · 中文 · Español · हिन्दी · العربية · Português · Français · 日本語 · Deutsch · Bahasa Indonesia

- **English by default**, plus Chinese, Spanish, Hindi, Arabic, Portuguese, French, Japanese, German and Indonesian.
- **Auto-detected** from the visitor's browser — no settings; the language switcher always wins.
- Site, dashboard, console, emails, Telegram bot and error messages; Arabic reads right to left.

TERMS

Pay only for what you sell

$0

Setup

We create your site for free.

$0

Monthly fee

No subscription, no minimum spend.

Same price

Purchase price

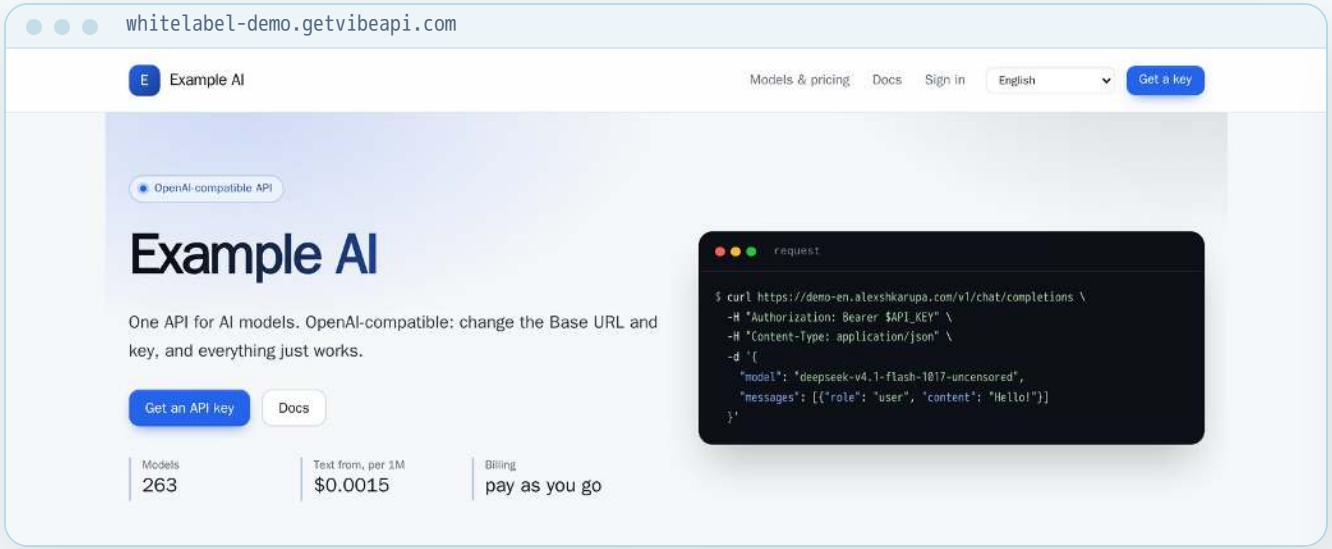

The same as for regular GetVibe clients — per request your clients make.

Your client's price = **our price** + **your margin**

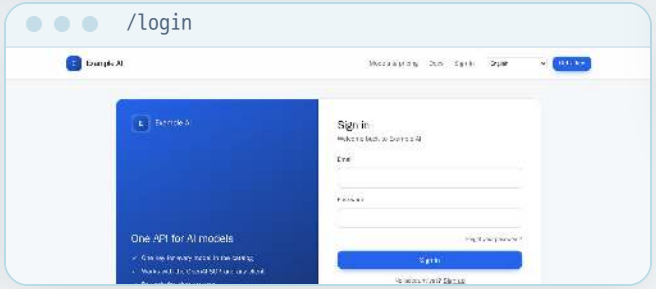

You set the margin: site-wide, per model or channel, by price band, or as a fixed price. In fixed-price mode a channel costing more than your price is not used; in Simple mode a sell price below cost is highlighted in red.

LIVE DEMO

Try it as your client would

DEMO ACCESS

LOGIN

demo@demo-en.alexshkarupa.com

PASSWORD

Demo-3591a509

Test balance $1

Client dashboard: keys, a playground, media generation, usage stats.

HOW TO START

From request to first clients

1

Request

Tell us about you, your brand and your audience.

2

We create your site

Domain, brand, your country, payments (your Stripe or via us), Canada or France.

3

Setup and acceptance

A wizard in the console: email, payments, bot, domain, prices, wholesale balance. Then a mandatory pass / fail acceptance check.

4

Go live

Accept payments and sell under your own brand.

You start taking client money only after the acceptance check passes — that is how we make sure everything works.
